WORK EXPERIENCE

SuccessionNow **Remotely**
Software Engineer *Dec 2024 – present*

- Develop and maintain web applications using the MERN stack (MongoDB, Express.js, React, Node.js).
- Work in a small, fast-paced team to rapidly build and deploy web solutions that meet client needs.
- Provide technical support and mentorship to junior developers, guiding them in best practices and problem-solving.
- Collaborate with stakeholders to refine project requirements, ensuring smooth and efficient development cycles.
- Continuously optimize code and application performance while ensuring scalability and maintainability.
- Built and deployed a client-facing dashboard enabling HR teams to manage employee evaluations in real-time.

SuccessionNow **Remotely**
Software Quality Assurance Lead *April 2024 – Dec 2024*

- Collaborated with senior management to brainstorm and propose enhancements for succession planning and employee evaluation web applications.
- Conducted manual and automated testing of the MERN stack applications, identifying and reporting bugs to ensure stability and performance.
- Trained junior team members in software testing methodologies and use of QA tools such as Jest, Selenium, Playwright.
- Facilitated client satisfaction by ensuring final deliverables meet specified requirements and quality standards.
- Spearheaded testing and validation for a performance review system used by 500+ employees across multiple organizations.
